Principle 1

The internet is an integral part of modern life—a key component in education, communication, collaboration, business, entertainment and society as a whole.

Principle 2

The internet is a global public resource that must remain open and accessible.

Principle 9

Commercial involvement in the development of the internet brings many benefits; a balance between commercial profit and public benefit is critical.

Principle 10

Magnifying the public benefit aspects of the internet is an important goal, worthy of time, attention and commitment.

How healthy is the internet?

Our 2019 compilation of research explains what's helping and what's hurting the internet across five issues, from personal experience to global concerns.

Is it safe?

How open is it?

Who is welcome?

Who can succeed?

Who controls it?

Urban mobility increasingly involves a mix of private and public transit. Who gets the data? // Richard Vogel/AP

Who Owns Urban Mobility Data?

DAVID ZIPPER JAN 7, 2018

Policymakers need it; private transportation companies have it. Here's one way to broker a solution.

Let's find smarter ways forward, together.

In April 2019, Google dismantled its brand-new ethics board for development of artificial intelligence (AI) after just one week. The announcement followed an employee protest staged by thousands of Google staffers who were outraged that the board included members accused of discrimination against transgender people, climate change skepticism and the use of artificial intelligence in warfare.

SHAPE THE MINDSET

About the Public Interest Technology University Network

The Public Interest Technology University Network is a partnership that fosters collaboration between 21 universities and colleges committed to building the field of public interest technology.
